Backyard Bug Graph

This is the bug I found

I think it is a _____

It has _____

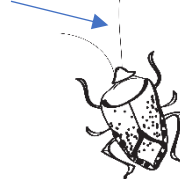

Word Bank:

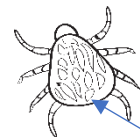

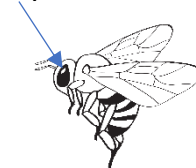

wings

antenna

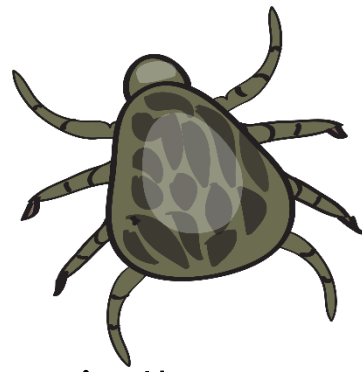

eyes

hard shell

The Wood Tick

Wood ticks are bugs that live in the woods and tall grass. They eat blood from animals. To eat they have a tube mouth that goes in the skin of the animal.

They eat for up to 2 or 3 days then fall off. Wear long clothes to keep them off!

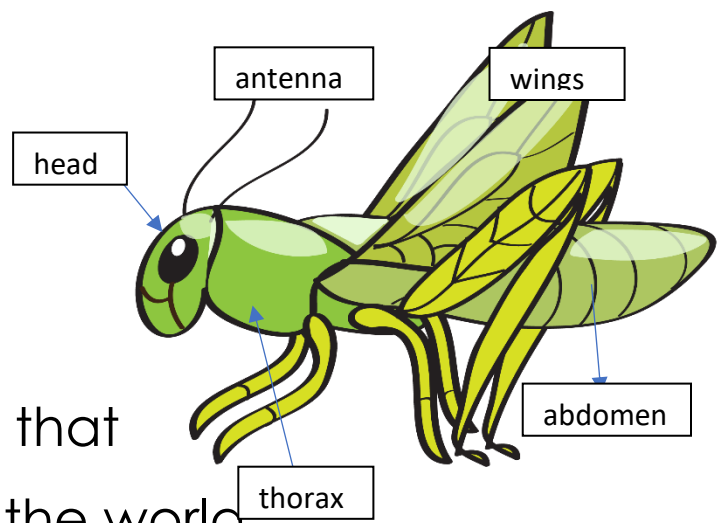

Questions:

Where do they live? _____

They eat with a _____ mouth.

How do you keep them off you?

The Grasshopper

Grasshoppers are insects that hop! They live all around the world.

Grasshoppers eat plants. They have 2 sets of wings and 6 legs.

Like all insects they have a head, thorax and abdomen. Grasshoppers lay eggs.

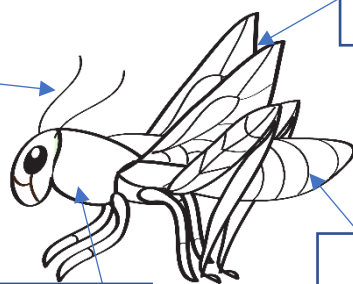

Did you know some people eat grasshoppers?

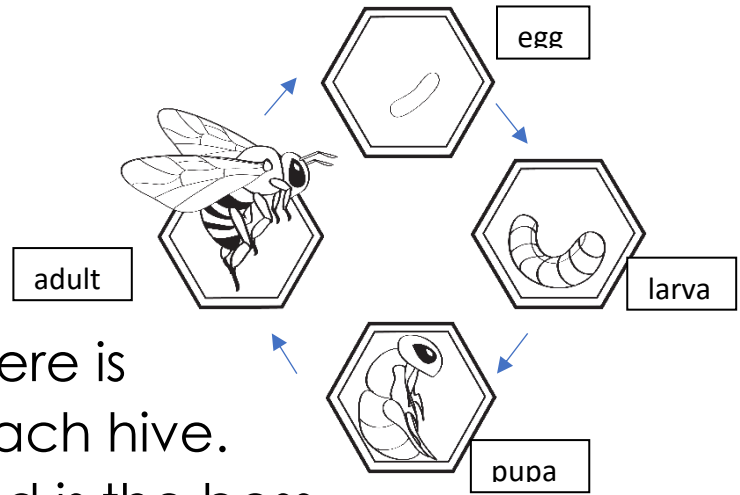

Questions:

What do grasshoppers eat? _____

Label the grasshopper:

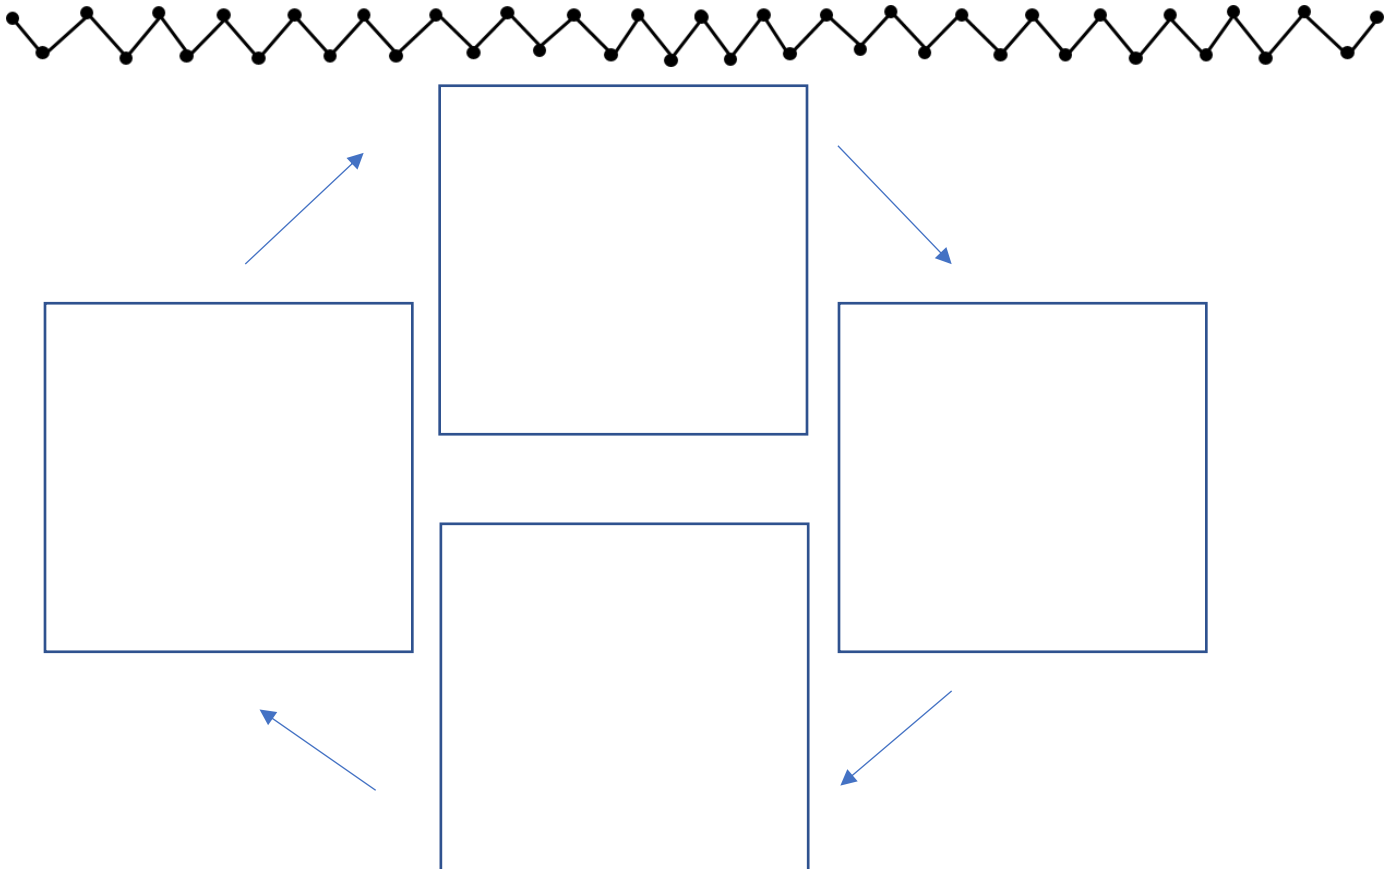

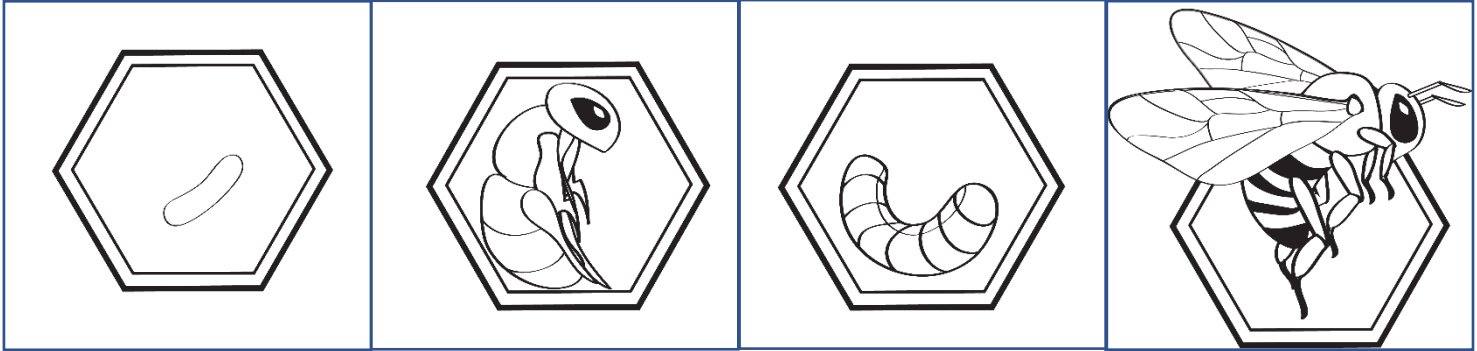

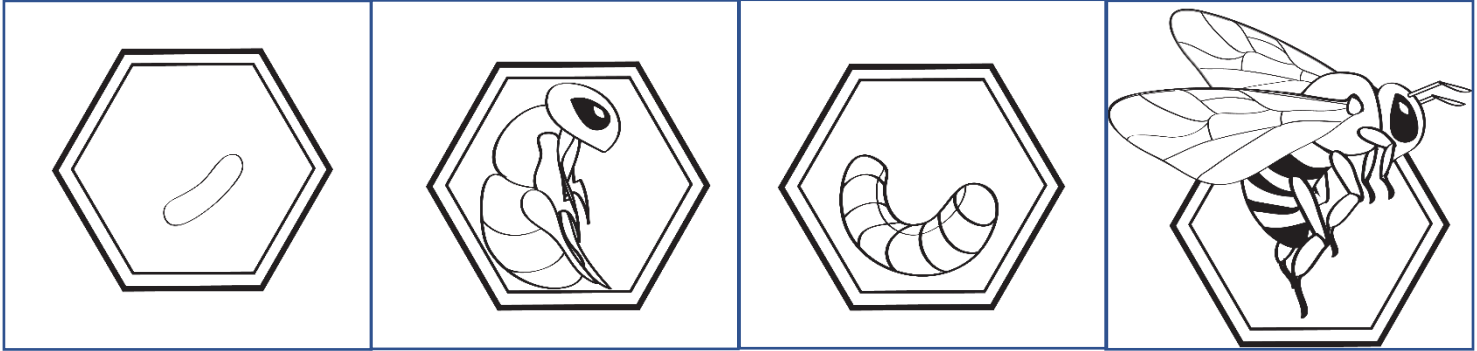

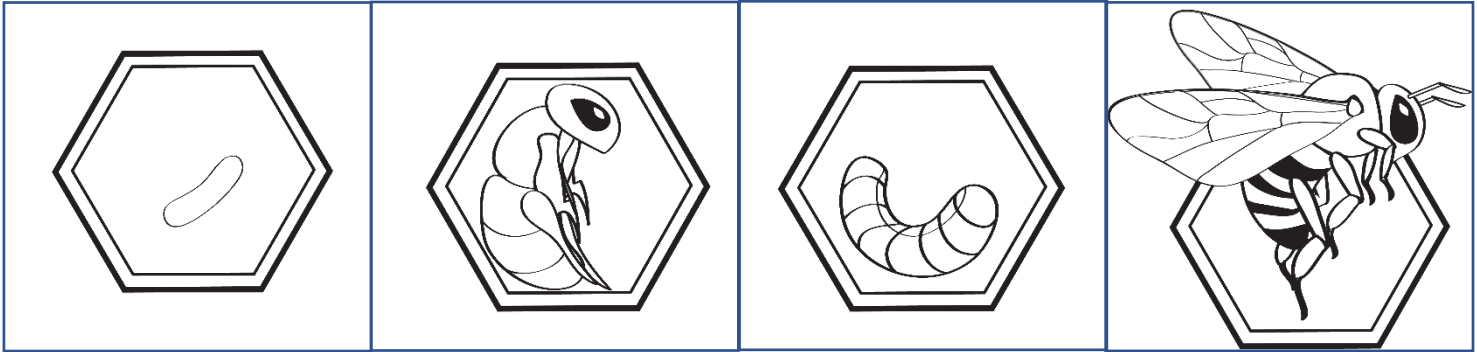

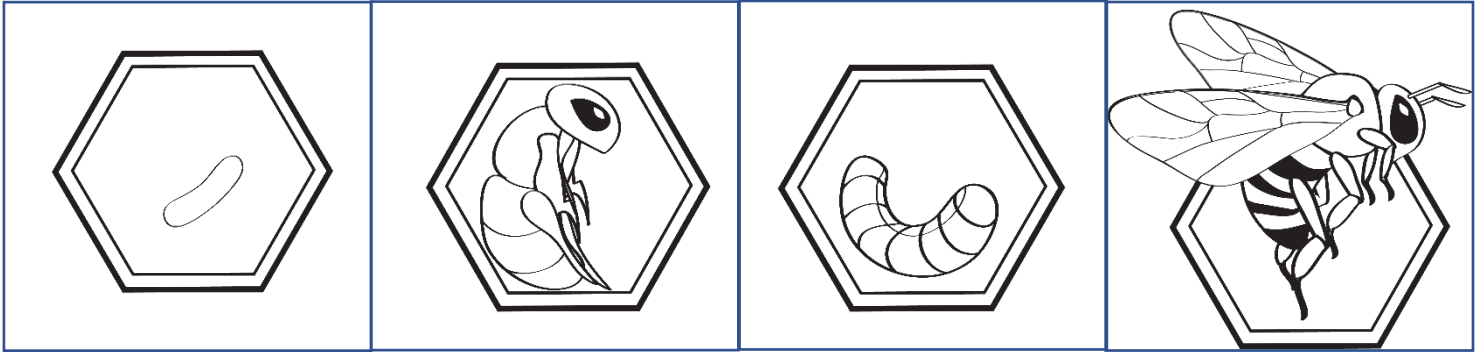

The Bee

Bees live in hives. There is one queen bee in each hive. She lays the eggs and is the boss of the hive.

Bees are good pollinators. Most of the bees you see flying are females. They are the worker bees. Male bees are called drones and are found in the hive. Drone bees do not have a stinger.

The Stinkbug

Stink bugs can be brown, green or grey. They have a hard shell. Stink bugs eat fruit, Flowers, leaves and caterpillars. Their nose is like a needle and sticks into their food.

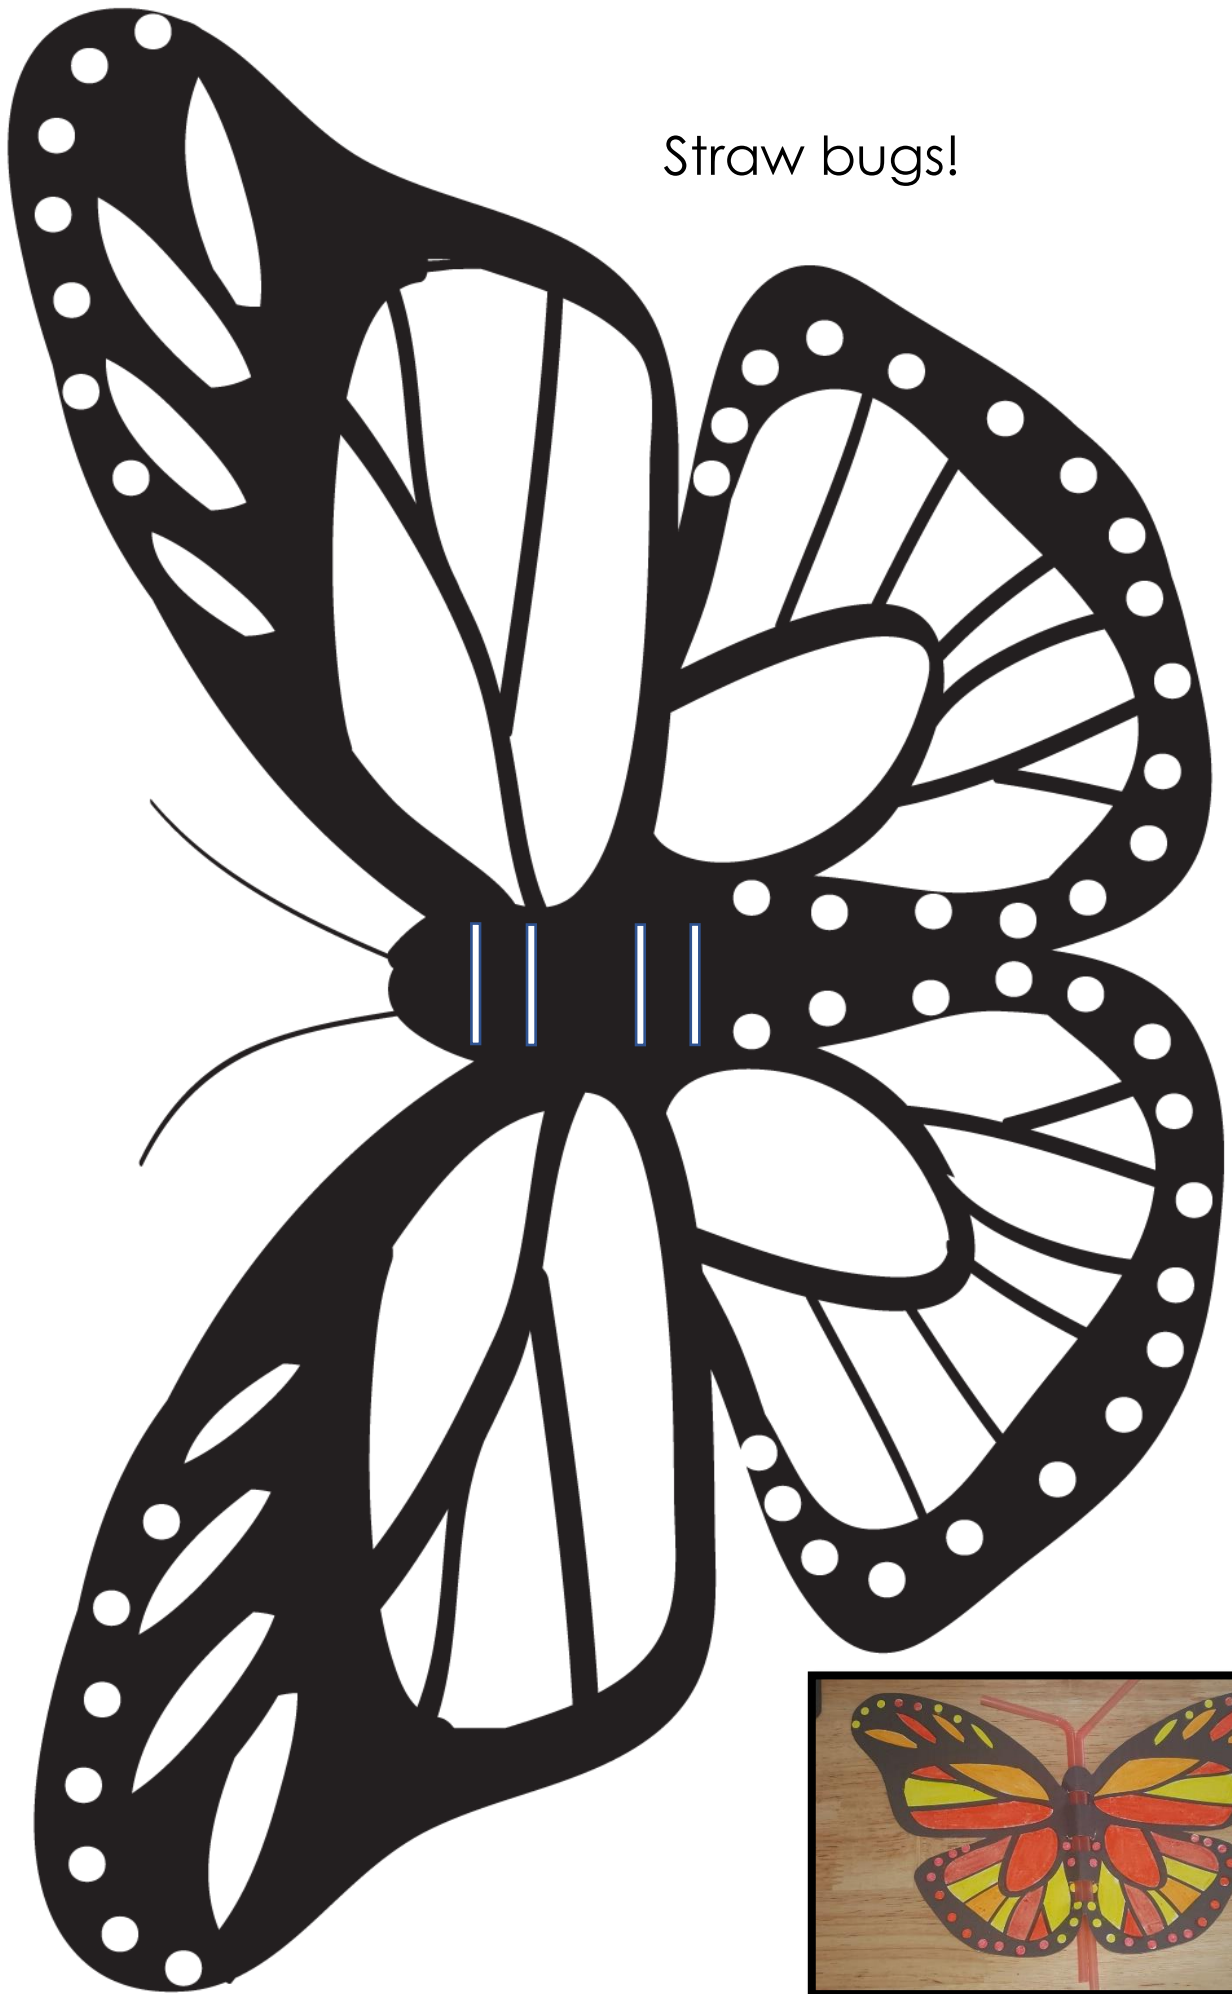

Stink bugs let a bad smell out when they are scared. They do not like cold and hibernate in the winter.

What happens to stink bugs in the winter?

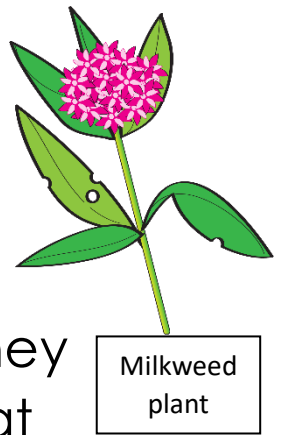

Do you think a stink bug would make a good pet? Why or why not?

Straw bugs!

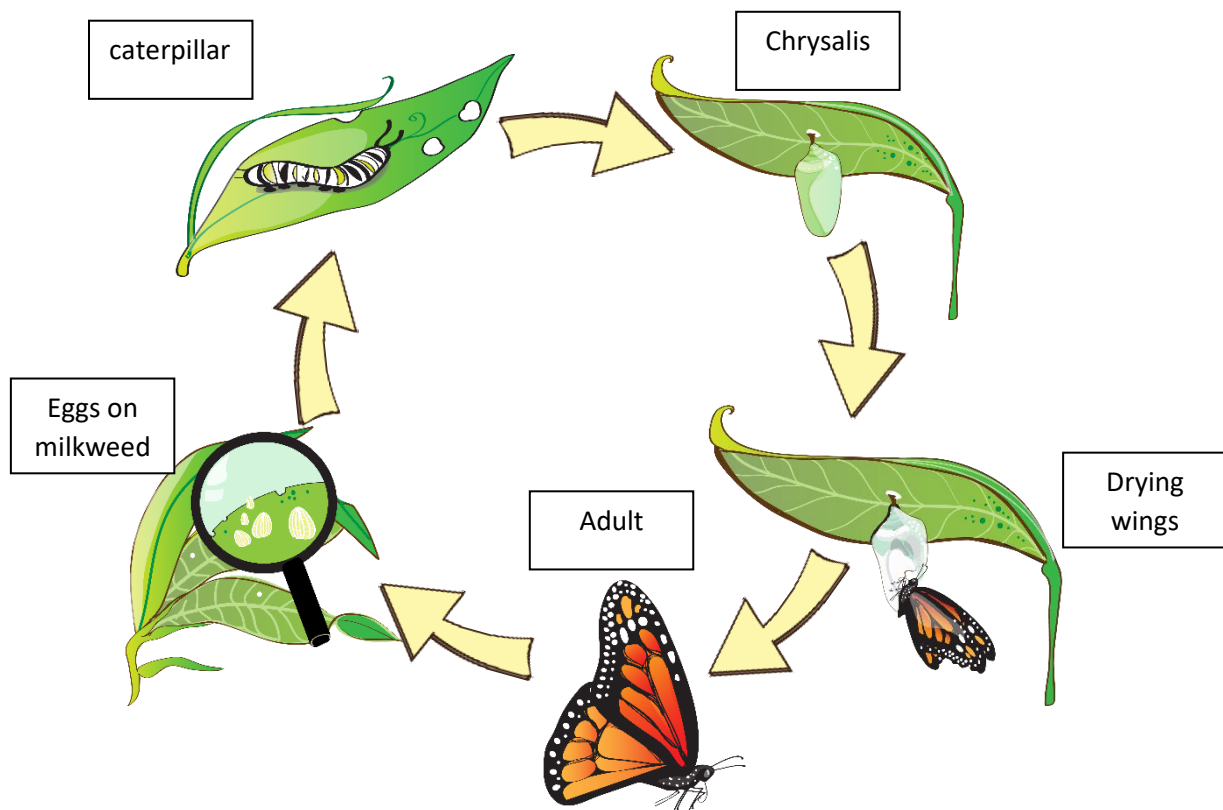

The Monarch Butterfly

Monarch butterflies are orange, black and white. They are poisonous to predators. They get the poison from the milkweed plant that they eat as a caterpillar.

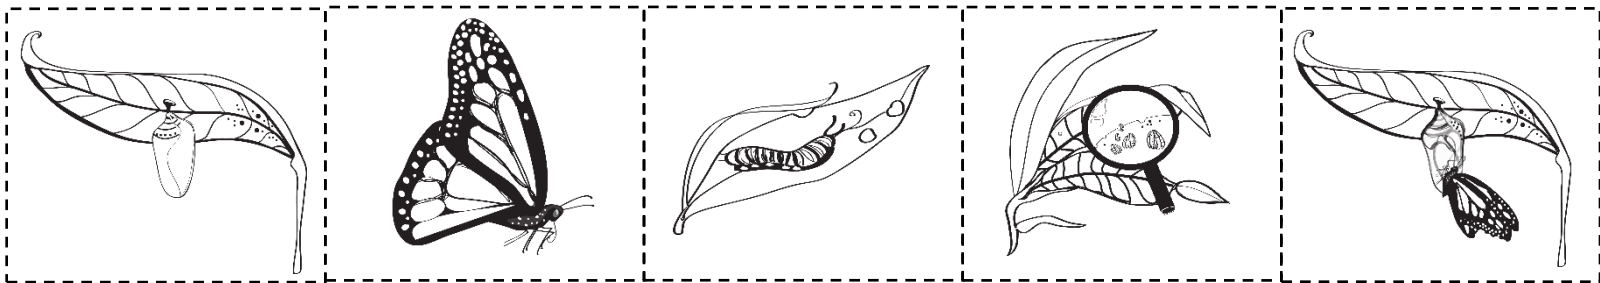

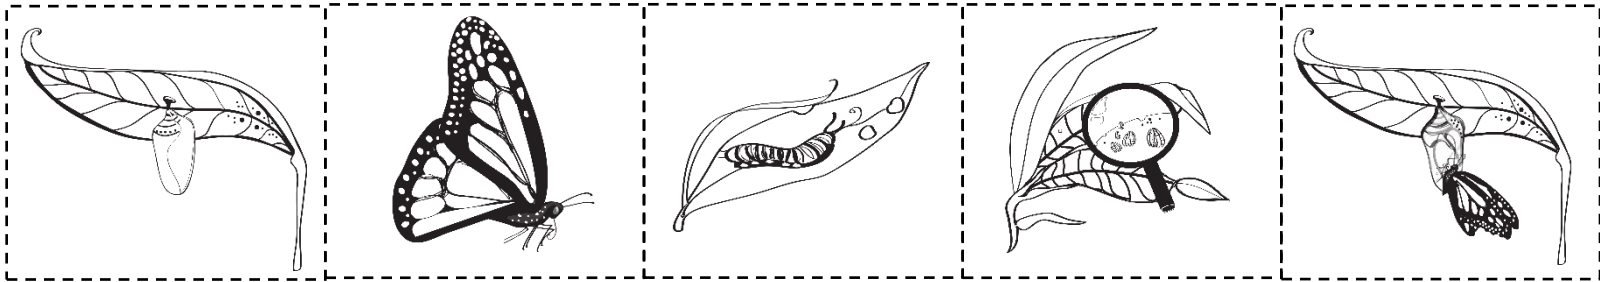

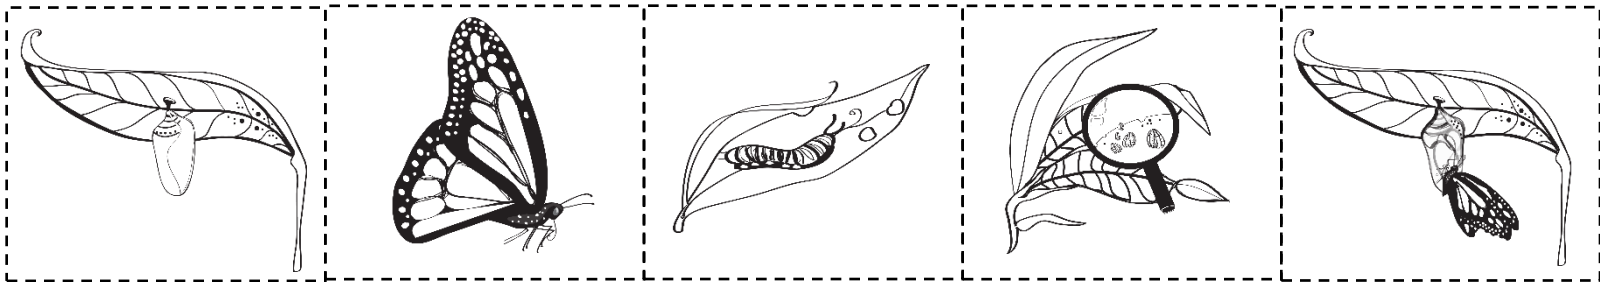

The caterpillars have orange, black and white bands. They only eat milkweed.

The butterfly starts as an egg, then the egg hatches into a caterpillar. The caterpillar will make a chrysalis where it will change into a butterfly after 30 days.

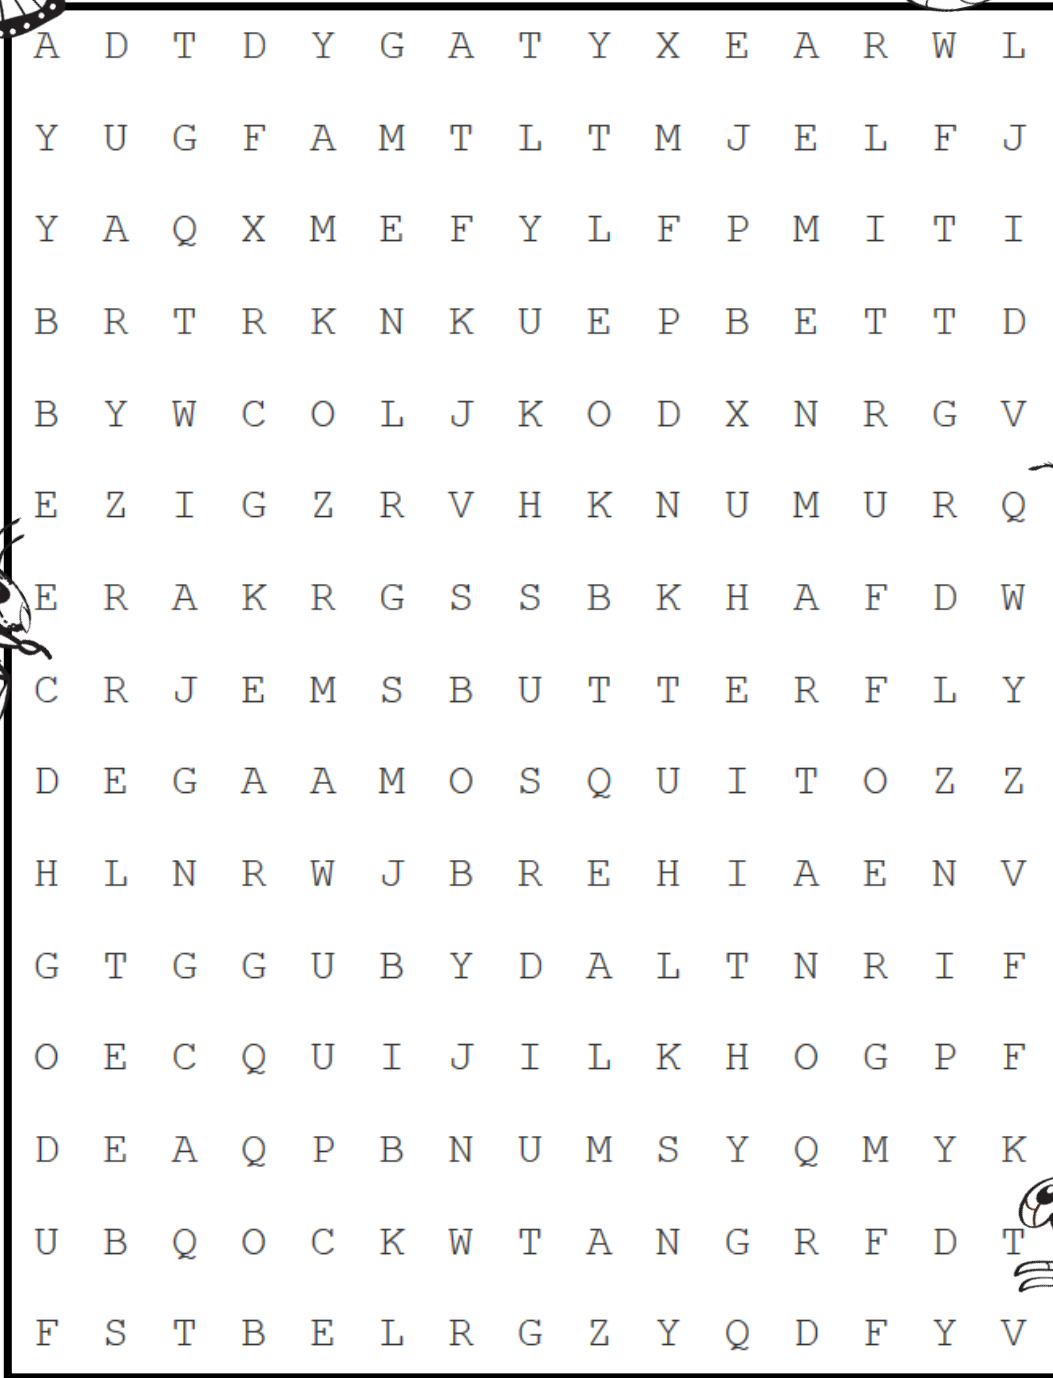

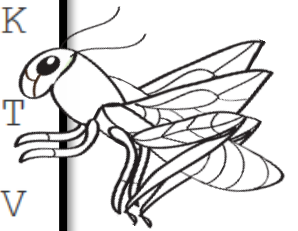

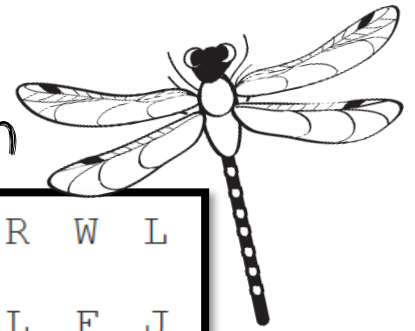

[illegible]

This image shows a handwriting practice sheet. It contains four identical sets of horizontal lines for tracing. Each set consists of three lines: a solid top line, a dashed middle line, and a solid bottom line. The first set of lines has a small arrow pointing to the right at the beginning of the top solid line, indicating the starting point and direction for writing. The remaining three sets of lines are identical but do not have the starting arrow.
